Author contribution statement example elsevier

Then select the 'Edit' ( ) button for an author, or else select the 'Add an Author' button to open a popup to enter the information. The corresponding author is responsible for ensuring that the descriptions are accurate and agreed by all authors. CRediT (Contributor Roles Taxonomy) offers authors the opportunity to share an accurate and detailed description of their diverse contributions to the published work. This phenomenon may be linked to researchers increasing their apparent productivity by "fractionalizing" their research across more published articles or to "big science", whereby large, multinational teams must collaborate.The future of CRediT will aim to enhance trust and transparency in publications for researchers and readers. The solution requires the corresponding author to indicate one or more contributor roles for each co-author by selecting one or more of the CRediT roles in Editorial Manager. Tick all the roles that apply to the author as in this example . When asked about the benefits of CRediT, the main benefit listed by 57% of surveyed authors was that it contributes to greater clarity around authorship.Helping prevent author disputesAuthorship disputes occur when authors cannot agree on who deserves to be listed as an author, or the order in which authors should appear. For further assistance: Opens new window Download file Opens an image CRediT (Contributor Roles Taxonomy) was introduced with the intention of recognizing individual author contributions, reducing authorship disputes and facilitating collaboration. When completed The contribution details are recorded for each author. For example, there is a growing trend, dubbed "hyperauthorship opens in new tab/window", where some journal papers have more than 50 authors. Wang Wu: Visualization, Investigation. Jan Jansen: Supervision.: Ajay Kumar: Software, Validation.: Sun Qi: Writing- Reviewing and Editing,Read more about CRediT here opens in new tab/window or check out this article from Authors' Update: CRediT where credit's due.Further resourcesCheck out this short video explainer on CRediT opens in new tab/window to see how the system works in Editorial Manager and see an example CRediT statement on ScienceDirect. The journal may require you to select the degree of contribution for each selected role, as in this screenshot . Authors may have contributed in multiple roles. Feedback from authors of all disciplines was positive with a clear majority (71%) agreeing CRediT is a positive step towards improved transparency and recognition around scholarly published work. This information is then automatically added as an authorship statement to the article on ScienceDirect. Such disagreements can lead to erosion of professional relationships, delays in publication, and in extreme cases, even the retraction of papers. Last updated on April 16, 2025 Last updated on April 16, 2025 Most Elsevier journal on EM request submitting authors to indicate the Contributor Role for each listed co-author during submission. The idea came about following a 2012 collaborative workshop led by Harvard University and the Wellcome Trust, with input from researchers, the International Committee of Medical Journal Editors (ICMJE) and publishers, including Elsevier, represented by Cell Press.CRediT offers authors the opportunity to share an accurate and detailed description of their diverse contributions to the published work.The corresponding author is responsible for ensuring that the descriptions are accurate and agreed by all authorsThe role(s) of all authors should be listed, using the relevant above categoriesAuthors may have contributed in multiple rolesCRediT in no way changes the journal's criteria to qualify for authorshipCRediT statements should be provided during the submission process and will appear above the acknowledgment section of the published paper as shown further below.TermDefinitionConceptualizationIdeas; formulation or evolution of overarching research goals and aimsMethodologyDevelopment or design of methodology; creation of modelsSoftwareProgramming, software development; designing computer programs; implementation of the computer code and supporting algorithms; testing of existing code componentsValidationVerification, whether as a part of the activity or separate, of the overall replication/ reproducibility of results/experiments and other research outputsFormal analysisApplication of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study dataInvestigationConducting a research and investigation process, specifically performing the experiments, or data/evidence collectionResourcesProvision of study materials, reagents, materials, patients, laboratory samples, animals, instrumentation, computing resources, or other analysis toolsData CurationManagement activities to annotate (produce metadata), scrub data and maintain research data (including software code, where it is necessary for interpreting the data itself) for initial use and later reuseWriting - Original DraftPreparation, creation and/or presentation of the published work, specifically writing the initial draft (including substantive translation)Writing - Review & EditingPreparation, creation and/or presentation of the published work by those from the original research group, specifically critical review, commentary or revision – including pre-or postpublication stagesVisualizationPreparation, creation and/or presentation of the published work, specifically visualization/ data presentationSupervisionOversight and leadership responsibility for the research activity planning and execution, including mentorship external to the core teamProject administrationManagement and coordination responsibility for the research activity planning and executionFunding acquisitionAcquisition of the financial support for the project leading to this publication*Reproduced from Brand et al. Publishing contacts will reach out to editors when the workflow is ready for implementation on their journal.We are also exploring other challenges CRediT can help address. Scroll down to the heading Contributor Roles and select "Click here to select roles" to reveal the CRediT list. Anne Kitson, Managing Director of Cell Press and The Lancet, reflects on the introduction of CRediT: "Since we started offering CRediT to authors as an option for their contributions section, we've had positive feedback about the structure being easy to use and a helpful step in providing more transparency and consistency around the reporting of author contributions. We look forward to the expansion of the solution so that authors get the credit they deserve for their meaningful contributions.Learn moreCRediT roles opens in new tab/windowConceptualization: Ideas; formulation or evolution of overarching research goals and aimsMethodology: Development or design of methodology; creation of modelsSoftware: Programming, software development; designing computer programs; implementation of the computer code and supporting algorithms; testing of existing code componentsValidation: Verification, whether as a part of the activity or separate, of the overall replication/ reproducibility of results/experiments and other research outputsFormal analysis: Application of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study dataInvestigation: Conducting a research and investigation process, specifically performing the experiments, or data/evidence collectionResources: Provision of study materials, reagents, materials, patients, laboratory samples, animals, instrumentation, computing resources, or other analysis toolsData Curation: Management activities to annotate (produce metadata), scrub data and maintain research data (including software code, where it is necessary for interpreting the data itself) for initial use and later reuseWriting — original draft: Preparation, creation and/or presentation of the published work, specifically writing the initial draft (including substantive translation)Writing — review & editing: Preparation, creation and/or presentation of the published work by those from the original research group, specifically critical review, commentary or revision – including pre-or post-publication stagesVisualization: Preparation, creation and/or presentation of the published work, specifically visualization/ data presentationSupervision: Oversight and leadership responsibility for the research activity planning and execution, including mentorship external to the core teamProject administration: Management and coordination responsibility for the research activity planning and executionFunding acquisition: Acquisition of the financial support for the project leading to this publicationFurther readingAuthor contributions Please insert here the contribution each author made to the … CRediT offers authors to share an accurate and detailed description of their … Examples of author contribution statements . Was this answer helpful? . (2015), Learned Publishing 28(2), with permission of the authors.Sample CRediT author statementZhang San: Conceptualization, Methodology, Software Priya Singh.: Data curation, Writing- Original draft preparation. Select the 'Author' heading to open the list of authors . After completing all the other author information, select the 'Save' () button at the top or bottom. During submission, proceed to the Manuscript Data step . "Before expanding CRediT to further Elsevier journals, we surveyed around 300 researchers from all fields to ensure we understood researcher needs around authorship. CRediT in no way changes the journal's criteria to qualify for authorship. A.B. and B.C. conceived of the presented … Journals may publish the information in the article as a CRediT statement, as seen in the example at the bottom of this page. The role(s) and degree of contribution of all authors should be listed, using the relevant categories defined by . CRediT can help by encouraging co-authors to start discussing authorship and who contributed what early in the process, as recommended by the Committee on Publication Ethics' (COPE) guide on handling authorship disputes opens in new tab/window.What's next for CRediT?The rollout of an integrated CRediT solution for all suitable journals at Elsevier will continue in the second quarter of 2023 and scale from there. These roles show how each person contributed to the article. How Submitting authors may be asked or required to select one or more CRediT roles for each author, including the submitting author.
